SUMMARY

Full-stack engineer with 3 years at Fiserv building online banking features for retail and business customers in C#, ASP.NET, React and SQL. Independently ships tested web apps and developer tools in TypeScript, JavaScript and Unity.

EXPERIENCE

Fiserv — Software Development Engineer, Berkeley Heights, NJ — Jan 2024 – Present

- Shipped features and third-party integrations across 100+ pull requests, building REST APIs and React UI in C#, ASP.NET and SQL
- Replaced a load-everything transaction history with server-side cursor pagination, adding a separate cached path for unusually large histories
- Extended multi-account transaction download to another core banking system, building core-specific transaction mapping and CSV export, and took it through cross-core regression testing to production
- Automated ACH and wire routing data maintenance with SQL scripts and a scheduled sync job, replacing manual work
- Drove ACH production incidents from JIRA triage to resolution using AI-assisted root-cause analysis, and wrote Confluence runbooks for the team

Fiserv — Technical Trainee, Berkeley Heights, NJ — Sep 2023 – Jan 2024

- Built a full-stack capstone in five months (React, Spring Boot REST API, MySQL) and presented it for stakeholder sign-off

CUNY Building Performance Lab — Student Intern, New York, NY — Nov 2022 – May 2023

- Charted energy flow through heating and cooling systems in NYC buildings and presented ways to cut energy use

PROJECTS

SliceOfPie — offline receipt-scanning bill splitter | *TypeScript, ONNX Runtime, Workbox, Playwright* — Live · Code

- Chose PaddleOCR over Tesseract.js after it read every price on 16/16 test receipts vs 4/16; runs offline in a Web Worker
- Reached 99 Lighthouse mobile performance with ~25 KB of startup JavaScript; 245 Vitest and Playwright tests run on every push

Behavior Tree Editor — visual editor and Unity runtime for game AI | *JavaScript, Canvas, Tauri (Rust), C#* — Live · Code

- Built a canvas node-graph editor with a replay debugger and sub-second hot reload into Unity, shipped as a 2.5 MB desktop app
- Drives my Unity game's enemy AI; a test runs 14 trees through both runtimes for 9,000 ticks each and diffs every command

Pocket Quest — phone-controlled co-op tactics RPG | *JavaScript, WebRTC, Cloudflare Workers, Playwright* — Live · Code

- Built host-authoritative multiplayer over three fallback transports with auto-reconnect; players join by QR code, no install
- Wrote a CI self-play test in which bots play a full campaign in headless Chromium on every push

RJN Visuals — client site for a photo and video studio | *Next.js, React, TypeScript, SCSS* — Live · Code

- Designed and built a video-heavy portfolio and booking site with case studies, YouTube/Instagram embeds and a contact form

EDUCATION

Queens College (CUNY) — B.A. Computer Science, Minor in French · Pi Delta Phi French Honor Society — Aug 2019 – Sep 2023

LEADERSHIP

QC TROPA — Founder and President — Aug 2022 – May 2023

- Grew a Filipino cultural organization from zero to 30–40 active members; ran 8 meetings, 6 workshops and an annual festival

Couples for Christ Youth — Household Leader — Apr 2015 – Present

- Lead monthly youth programs and leadership training, and run community service initiatives

SKILLS

Languages and frameworks: C#, TypeScript, JavaScript, SQL, Java, Python · ASP.NET, .NET, React, Next.js, Spring Boot, Unity
Testing and DevOps: Playwright, Vitest, unit testing, Git, GitHub Actions (CI/CD), Vercel, Cloudflare Workers
Data and tools: SQL Server, MySQL, JIRA, Confluence, ReSharper
Practices: REST API design, application security, secure code review, Agile/Scrum
Spoken: English, Tagalog (native) · French (intermediate; minor) · Spanish (basic)
