SUMMARY

Software Development Engineer with three years of full-stack experience at Fiserv, building and securing features on an enterprise online banking platform used by retail and business customers. Comfortable across C#, ASP.NET, React, and SQL, with hands-on work in Fortify static analysis, vulnerability remediation, and production incident response for ACH systems. Also builds modern, responsive front-end experiences independently, including client-facing portfolio websites using Next.js, TypeScript, and SCSS. Finished a Computer Science degree at Queens College. Exploring AI-assisted development and benchmarking AI-generated code against manual implementations to see where each approach actually helps. Bringing years of leadership experience from founding a 30 to 40 member cultural organization and mentoring within a faith-based youth program, I am now looking to grow into a more senior full-stack engineering role, while continuing to build toward game development on the side.

EXPERIENCE

Fiserv - Software Development Engineer

Berkeley Heights, NJ
January 2024 – Present

- Delivered 10+ platform features and third-party integrations for an enterprise online banking platform serving retail and business customers, measured by zero critical post-release defects, by designing and implementing REST APIs and UI components in C#, ASP.NET, React, and SQL within an Agile/Scrum development workflow with Git-based version control and peer code review.
- Reduced mean time to resolution on production incidents, measured by faster on-call turnaround, by using AI-assisted root-cause analysis (Claude) and authoring standardized runbooks in Confluence that improved cross-team incident response.
- Improved concurrent session performance across a multi-account download feature spanning five banking cores, measured by elimination of thread-safety and cache-isolation defects, by refactoring core data-access logic and applying concurrency-safe design patterns.
- Eliminated manual routing-table maintenance across financial institutions, measured by 24,000+ ACH/Wire records automated, by building SQL deployment scripts and a scheduled synchronization job that ran automatically on a recurring basis.
- Strengthened application security and audit compliance, measured by remediation of 1,150+ vulnerabilities, by conducting AI-assisted threat modeling and secure code reviews during feature development.

Fiserv - Technical Trainee

Berkeley Heights, NJ
September 2023 – January 2024

- Built and delivered a full-stack capstone application, measured by successful stakeholder demo and program completion, by developing and integrating a React.js front end, Java Spring Boot REST API backend, and MySQL database with unit-tested business logic during a five-month intensive training program.
- Aligned technical and non-technical stakeholders on architecture decisions, measured by clear stakeholder sign-off, by presenting system design rationale and implementation trade-offs in accessible, non-technical terms.

CUNY Building Performance Lab

Student Intern

New York, NY
September 2022 – May 2023

- Built trend charts in Universal Translator 3 to visualize energy flow across heating and cooling systems in NYC buildings.
- Presented data-driven recommendations to stakeholders, directly informing energy-saving strategy decisions.

BURGER KING

Overnight Shift Crew Member

Queens, NY
April 2021 – September 2022

- Managed cash handling, inventory, and customer service during high-volume overnight shifts, building a strong foundation in reliability and multitasking.

EDUCATION

Queens College – City University of New York

Bachelor of Arts, Major in Computer Science; Minor in French

Queens, NY
August 2019 -

September 2023

Cumulative GPA: 3.136/4.0. Google CSSI Extension, Summer Program in Computer Science (2019). President of QC TROPA (2022–2023).

ACTIVITIES AND LEADERSHIP

COUPLES FOR CHRIST - YOUTH

April 2015 – Present

Household Leader

- Led monthly youth programs, coordinated leadership training, and managed nonprofit community service initiatives.

QC Together Representing an Organization for Philippine Americans (TROPA)

August 2022 - May 2023

President

- Founded and grew a Filipino cultural organization from the ground up to 30 to 40 active members, running 8 general body meetings, 6 cultural workshops, and an annual Filipino Cultural Festival.

SKILLS

Languages & Frameworks: C#, ASP.NET, React, SQL, JavaScript, Python, Java, C++, HTML, CSS

Tools & Practices: Fortify Software Security Center, Agile/Scrum, JIRA, Confluence, ReSharper, Unity (C#)

Spoken Languages: Native in Tagalog and English; Proficient in Spanish and French
